Increase ROI in Public WiFi with cnPilot™ and cnMaestro™

Cambium Networks products and solutions empower network operators to build and maintain public WiFi networks that increase return on investment while providing excellent user experience.

COST EFFECTIVE END-TO-END WIRELESS
Cambium provides more than WiFi access, offering PTP, PMP high-speed, and long-range backhaul solutions. Quick to install, easy to manage, end-to-end wireless - without the time and expense of digging trenches to lay cable.

WIFI MONETIZATION
Set up a hotspot service with cnMaestro’s built-in captive portal capability, use vouchers for tiered service with an integrated payment gateway for paid access, or integrate with Guest Access solutions from Cloud4wi and Purple.

VALUE FROM USER INSIGHTS
Learn more about your users and gather data for targeted marketing with Social Login on guest access. View the history of all key network parameters while the self-turning RF on your APs keeps maintenance needs low.

WIFI OFFLOAD
With Hotspot 2.0 (Passpoint) and Carrier class AAA support, users can leverage roaming agreements with carriers for additional revenue streams.
**cnPILOT™ E400 AND E500 WIFI ACCESS POINTS**

- 802.11ac dual-band access.
- Best in class capacity and performance: support for up to 256 wireless clients and 16 WLANs.
- Interoperable with WiFi portal providers such as Cloud4wi, PurpleWiFi
- Built-in customizable Hotspot portal
- Passpoint (Hotspot 2.0) Support
- Traffic tunneling options including L2GRE (SoftGRE), L2TP
- Auto RF: self optimizing RF management
- Band Steering and Airtime Fairness

**cnMAESTRO™ NETWORK MANAGER & HOTSPOT PORTAL**

- Cloud-based or on-premises platform.
- Built-in Guest Portal with fully customizable splash pages.
- Voucher-based tiered hotspot access.
- End-to-end network management including WiFi/PMP/PTP.
- Support for Social Login with Google+ and Facebook.
- No licenses needed to manage Access Points.
- Control user session time, traffic rates and bandwidth.
