**XR-320 Wall Mount Access Point**

High performance 802.11ac Wave 1 2x2 AP

**QUICK LOOK:**

- Wall mount AP with integrated switch
- Integrated 4 port Gigabit Ethernet switch with PoE output
- Cloud or on-premises management options
- EasyPass simplified Wi-Fi access
- SSO with Office 365 and Google G Suite

This high performance Gigabit Wi-Fi wall mount access point (AP) delivers multi-device wireless and wired connectivity for high bandwidth IP services in hotel rooms, hospital rooms, dormitories, offices, and similar locations.

The XR-320 AP is fast to deploy over existing in-wall cabling and simple to manage from anywhere with Xirrus Management System-Cloud (XMS-Cloud) or on-premise Xirrus Management System-Enterprise. This highly flexible AP with integrated Gigabit wired switch is purpose built for clean in-room aesthetics.

**LOWER COST OF IMPLEMENTATION**

Using existing in-wall cabling this versatile product can deliver instant Wi-Fi access, connectivity to multiple wired devices and pass through access for legacy devices like POTS. It eliminates the need to pull new cable to the ceiling for Wi-Fi AP deployment or new in-wall cables for additional wired devices.

**EASY TO MANAGE**

Combined with the Xirrus Management System (XMS), the XR-320 series APs deliver complete visibility and control of the Wi-Fi network, including users, devices, applications, network traffic and the RF environment - all from a single console. Designed for simple deployment, zero-touch configuration gets your network up and running in just minutes.

**ABOUT CAMBIUM NETWORKS**

Cambium Networks empowers millions of people with wireless connectivity worldwide. Its wireless portfolio is used by commercial and government network operators as well as broadband service providers to connect people, places and things. With a single network architecture spanning fixed wireless and Wi-Fi, Cambium Networks enables operators to achieve maximum performance with minimal spectrum. End-to-end cloud management transforms networks into dynamic environments that evolve to meet changing needs with minimal physical human intervention. Cambium Networks empowers a growing ecosystem of partners who design and deliver gigabit wireless solutions that just work.
